

NEW **BG 18mm Spark Plug Model RB777-1 For G3500 CAT Engines**

Made in the USA

Robust iridium disc design provides more electrode material – in fact more than twice the amount of some competitive spark plugs.

BG design utilizes proprietary technology including centrifugally cast silver to achieve a “colder running” spark plug.

The RB777-1 uses a monolithic (one piece, no joints, or seams) resistor which is more robust than the resistor in the competitor’s plugs.

The RB777-1 uses a double retention feature on the iridium electrodes to prevent separation.

BG’s spark plug reconditioning program makes model RB777-1 your most cost effective option...

For a fraction of the cost of a new plug, these spark plugs can be “reconditioned” using BG’s 22 step reconditioning process...

And because of BG’s unique electrode design, most spark plugs can be reconditioned more than once!

The BG Service Co., Inc.
